BESPOKE LOG CABINS

Create the log cabin of your dreams with our full bespoke service.
It couldn't be simpler

1. Measurements

First step will be to take measurements of the area and size of your log cabin. Your log cabin will be manufactured to the exact size, so these need to be accurate. If you would prefer, we can come and measure them for you.

2.

Log Cabin Design

Sketch out the layout of the desired log cabin, rooms, window positions, doors etc. This can be a rough sketch on a piece of scrap paper or a detailed drawing, we will produce the blueprints from your design.

3. Contact

Email your designs to us and one of our specialists will be in touch to go through the designs, suggest any changes and finalise the details, we will then draft up some official blueprints which we will send to you for approval or changes. Once approved we will require the initial payment. From there, your log cabin is sent to the warehouse to be manufactured.

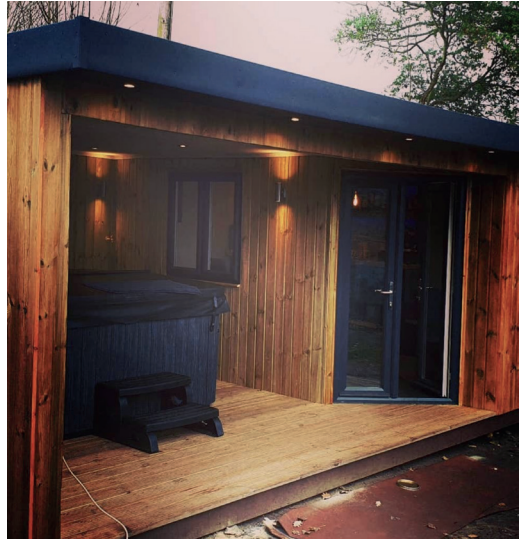

4.

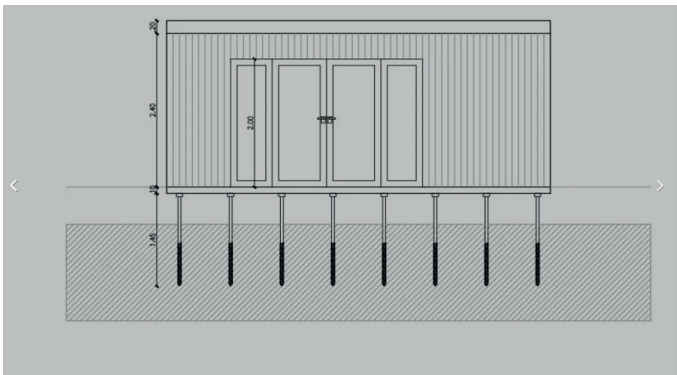

Delivery & Fitting

When the log cabin has been manufactured, we will arrange a date and time with you for delivery and fitting.

It couldn't be simpler!
